One-Way Plate Compactors

Multiquip's Mikasa Brand Plate Compactors are recognized as the industry standard for compacting granular soils and asphalt.

Thousands of satisfied users know that Multiquip has it all—top performance, easy handling, low maintenance and long life.

Our best-selling plate now features an advanced anti-vibration handle design that reduces vibration to the operator by 50% compared to other plate compactors.

MVC88

Easy to use, easy to transport, the MVC-88 is the newest and most technically advanced compactor on the market.

Protective engine guard

Sealed belt cover keeps dirt and rocks out of the belt

Convenient oil drain for engine oil

Cog-tooth belt drive for longer life

Self-cleaning plate design minimizes dirt and rock build-up

Engine oil shutdown

Four lifting handles — plate can be lifted from the sides

Powered by a 5.5-HP Honda GX-160 or a 5.7-HP Robin EX-17 gasoline engine

MVC88
3,450 lbs. centrifugal force

WHL88
Transport wheel kit

UPA88A
Urethane plate attachment for use on paving stones and brick pavers

13.7-qt. water tank

- Removable without tools
- Largest in its class
- Self-contained water shut-off valve

(Also available without water tank.)

There's a size and model for every application...

MVC64

- Perfect for small jobs or narrow areas
- Solid, high-strength steel base plate with curved edges provides top performance
- Extra-thick plate in back provides longer wear time
- Economical plate now features anti-vibration handle system
- Powered by Honda GX-120 or RobinEX-13 engine
- Optional water tank for asphalt use

MVC64
2,275 lbs.
centrifugal force

MVC80

- New model with anti-vibration handle
- Economical price tag
- Solid, high-strength steel base plate with curved edges for excellent performance and smooth turns on hot asphalt
- Powered by Robin or Honda engine
- Optional impact-resistant plastic water tank

MVC80
3,080 lbs. centrifugal force

MVC40G

MVC40G
1,573 lbs. centrifugal force

- Tubular steel roll bar cage protects engine components and provides a lifting point
- Powered by Robin engine
- Heavy-duty steel base plate — closed design, ribbed for extra strength
- Only 11.4" wide — ideal for narrow trenches

MVC90

MVC-90 incorporates more standard features than any other compactor in the industry.

MVC90
3,350 lbs. centrifugal force

- Tubular steel roll bar cage protects engine components and provides a lifting point
- Powered by Robin or Honda engines with oil alert and double V-belt drive
- Heavy-duty steel base plate — closed design, ribbed for extra strength
- Durable steel water-distribution system

MVC98D2

MVC98D2
Diesel powered
3,350 lbs. centrifugal force

- Tubular steel roll bar cage protects engine components and provides a lifting point
- Powered by Yanmar diesel engine
- Self-cleaning plate design minimizes dirt and rock build-up
- Durable 13.7 quart water tank (also available without water tank.)

Reversible Plate Compactors

Multiquip's Mikasa Brand Reversible Plate Compactors are the ideal high-production machines for efficient compaction of sand, gravel and cohesive soils.

In addition to some of the standard vibratory plate features, reversible plates have two eccentric weights which increase the compaction force while creating a smooth transition between forward and reverse travel.

MVH200

Choice of Honda gasoline or Yanmar diesel engine

Oil-bath vibrator for low maintenance

Heavy-duty vibrator bearings for long life

Diagonal heavy-duty shock mounts protect engine and operator from excessive vertical and horizontal vibrations

MVH200
7,056 lbs. centrifugal force

High-strength steel base plate with curved edges for top performance

Open base plate design allows rocks and dirt to slide off the plate for easier cleanup

Throttle

Reverse

Forward

Simple, easy-to-use controls allow direction to be changed at full RPM with the flip of a lever

Ultra-simple hydraulic reversing process

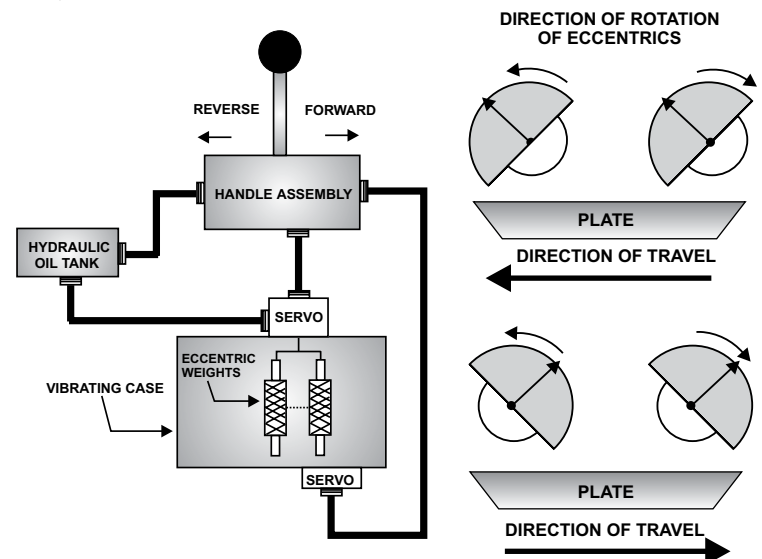

MVHR60/120/150

- Engine protection with top cover keeps dirt off engine
- Highly maneuverable—ideal for tight, confined areas
- Self-cleaning plate
- MVHR60 and 120 available with Honda engine
- MVH150 and 200 available with Honda gasoline or Yanmar diesel engine
- Optimal water tank available for MVH-R60H, 8.8 qts. (8.5 liters)

MVH Hydraulic System

- 1 As you start, pressure is generated with either a master cylinder (through model MVH200) or a rotary pump (MVH306 and larger).
- 2 Travel direction is determined by the relative position of the two eccentric weights to each other.
- 3 Forward and reverse direction is changed by means of switching the pressurized oil between servo pistons located on the eccentric case. The servo pistons change the position of the eccentric weights.
- 4 The hydraulic circuit is designed to return pressurized oil to the tank while the plate is in the neutral travel position. This allows for full compaction force while in neutral.

Reversible Plate Compactors

Multiquip's Brand Reversible Plate Compactors incorporate a unique hydraulic reversing mechanism, eliminating old-fashioned linkage adjustments.

There are no complicated mechanical drive shafts or cables to create problems, thus greatly reducing service time and expense.

MVH306

Available with Honda gasoline or Yanmar diesel engine

Roll cage protects engine and serves as lift bar

MVH306
10,125 lbs. centrifugal force

Fan integrated with clutch pulley
— cools air flow for longer belt life

Ribbed steel base plate
provides extra strength

Extension plates increase working area by 6" (included with MVH306, 402, 406, 502 and 702 series models)

Adjustable handle height for operator comfort reduces fatigue with the turn of a knob

Handle folds to 90° position for ease of transportation and storage

The high-performance heavyweights

MVH406/402

- 12,400 lbs. compaction force for high productivity
- Extension plates allow for additional utilization in different applications (standard equipment)
- MVH402 is powered by a Honda 13-HP gasoline engine; MVH406 is powered by either a Yanmar 10-HP diesel engine or Hatz/Subaru 9.7-HP diesel engine.
- Honda model is recoil start. Yanmar model is electric start with a recoil backup

MVH406

12,400 lbs. centrifugal force

MVH502

14,000 lbs. centrifugal force

Multiquip reversible plate compactors are perfect for difficult jobsite conditions—can be backed out of a trench while still compacting

MVH502

- 14,000 lbs. compaction force for high productivity
- Extension plates provide versatility for various applications (standard equipment)
- Powered by dependable Hatz 14.3-hp engine
- Electric start with hand-crank backup

MVH702

18,000 lbs. centrifugal force

MVH702

- Infrared remote control system for deep trench work
- Joystick operates as a “deadman” control system for safety purposes, moving to neutral position when released
- Optional 6” extension plates available, increasing width to 37.5”
- Fully enclosed frame protects components from damage caused by dirt and rocks

Multiquip's MVH306 is ideal for asphalt stamping jobs.
